

## Managing Power Loss on Takeoff

The Chicago Designated Pilot Examiners Association will have several Pilot Examiners present material covering how to prevent, and when necessary, manage a power loss at low altitude on takeoff. Preflight Risk Assessment, Aeronautical Decision Making and the flight techniques needed in these situations will be discussed. The Examiners will cover recent accidents in the District as well as some of their own experiences. Audience participation is a valuable resource with this subject, and will be encouraged. Preflight briefing including actions taken at various altitudes and the specifics of the environment of each particular runway will be included.

**Directions:** Illinois Aviation Academy is located at the northwest corner of DuPage Airport, right behind Pheasant Run.

### A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.  
Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
